Systems for window automation

Systems for window automation from GEZE improve comfort and safety in buildings significantly. At the same time, they reduce energy consumption through intelligent ventilation control and offer a wide variety of different functional options. The GEZE range covers everything from drive systems for natural ventilation and exhaust, right up to complete solutions (smoke and heat extraction systems) for preventive fire protection.

Door systems

Door systems from GEZE open up the most diverse possibilities in door design. State-of-the-art, innovative high-performance drive technology, safety, barrier-free access convenience and first class continuous drive design set them apart.

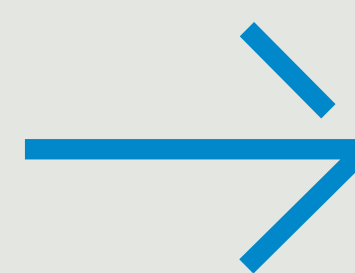

Safety systems

GEZE safety technology sets the standards where preventive fire protection, access control and protection of escape and rescue routes are concerned. For each of these objectives, GEZE offers individual solutions and perfectly coordinated concepts that combine individual safety requirements in an intelligent system.

Building automation

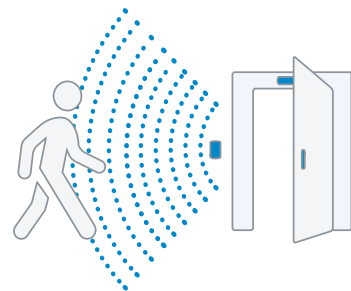

Building automation makes your building a more liveable place to be: it's safer and more comfortable, plus you save more energy. It facilitates the monitoring and operation of all window and door technology, something that is indispensable in larger buildings. For efficient building management in the smart building, we offer you a unique range of networking solutions.

New construction or refurbishment. All from a single source!

Enjoy competent advice from our experts during the planning phase on all questions related to door, window and safety technology. This ensures you will save costs over the long-term in implementation and operation. We can find solutions to meet your needs and adapt existing doors and windows to your needs or to new fire protection and safety concepts.

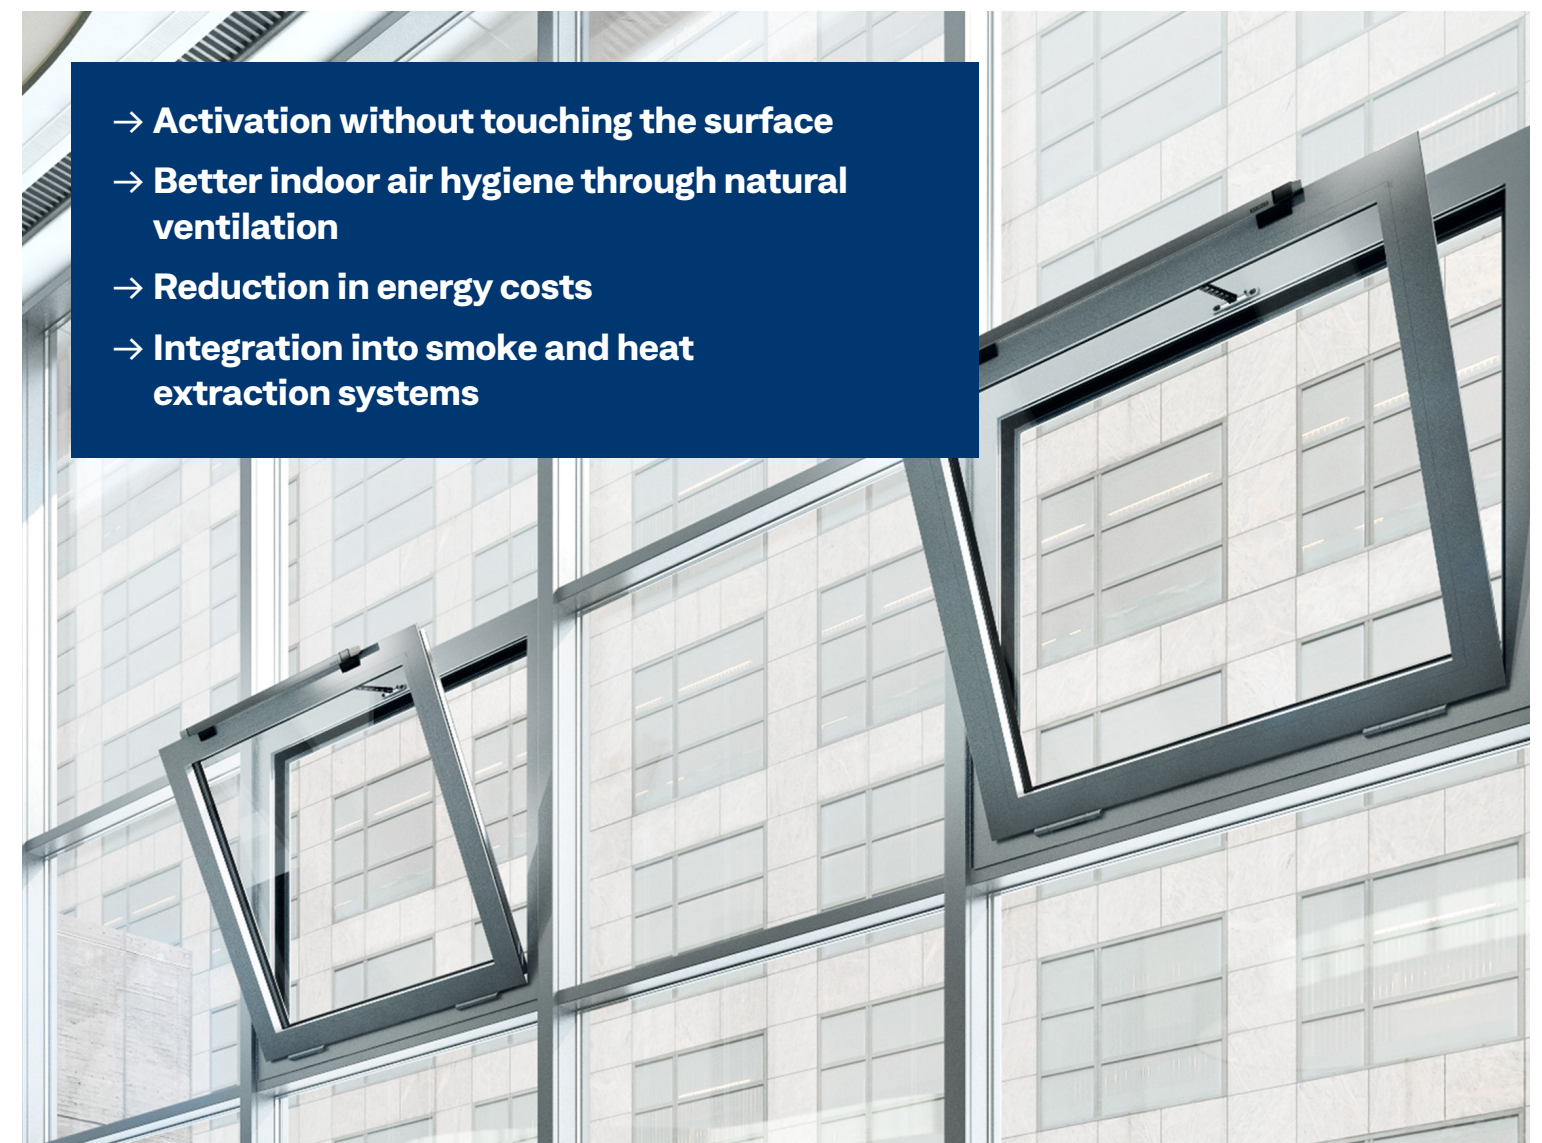

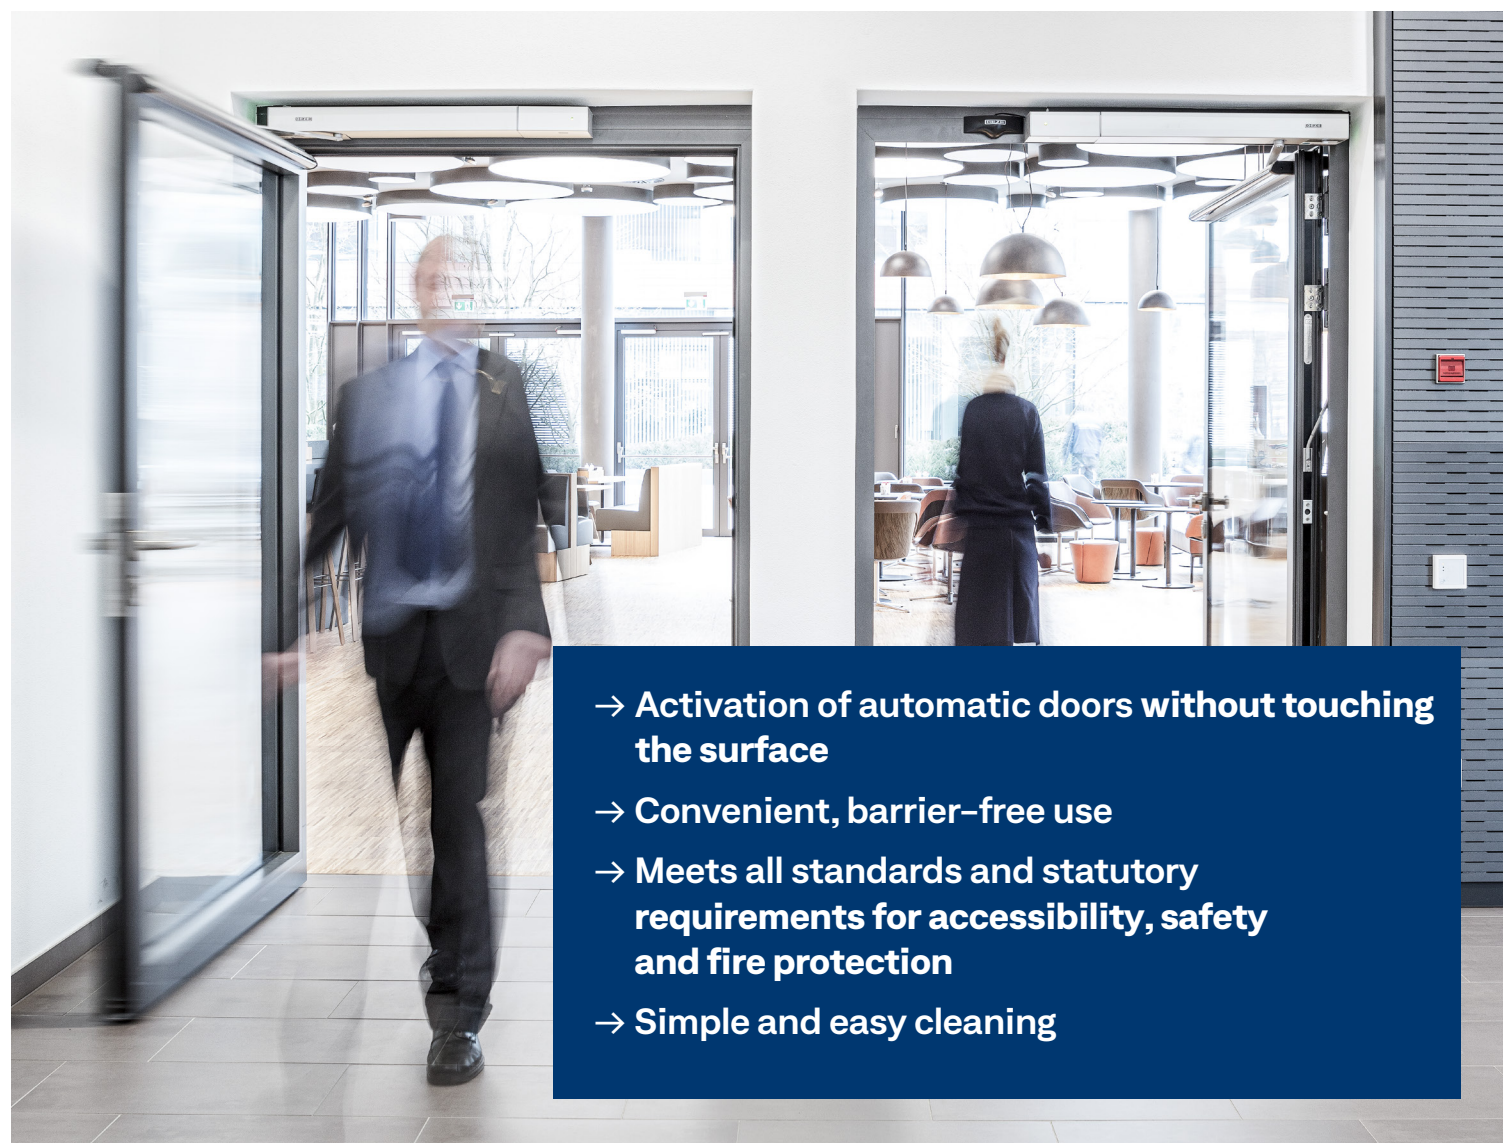

GEZE solutions for convenience, efficiency and safety in hotels and restaurants

AUTOMATIC DOOR SYSTEMS FOR NON-CONTACT ACCESS

WINDOW AUTOMATION SYSTEMS FOR INTELLIGENT VENTILATION CONCEPTS

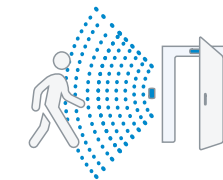

ENTRANCE AREA

Striking doors, with non-contact access

The entrance area is more than just the showpiece of a hotel or restaurant: guests and visitors are welcomed in style and comfort, while draughts and disturbing outside noises should be kept outside. GEZE offers automatic door systems that allow users to come and go conveniently and safely – even in high-traffic areas.

Convenience

Hygienic solution for using entrances conveniently, with no contact

Accessibility

Easy access for people with limited mobility

Safety

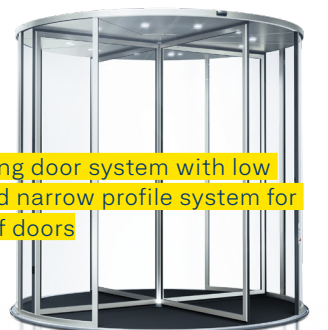

Highest passenger flows, maximum availability, and customer flow control

Noise reduction

Silent door drive and damping technology on revolving doors and acoustic insulation

→ Revo.PRIME

Automatic revolving door system with low canopy height and narrow profile system for three- or four-leaf doors

→ Slimdrive SLT NT-FR

Automatic linear sliding door system for escape and rescue routes with low overall height and clear design line

→ Powerturn

Electromechanical swing door drive for single leaf doors up to 600 kg

NETWORKING SOLUTIONS

Control, regulate, and easily monitor

Take advantage of synergies by networking automatic doors, windows and safety technology along with smart access control. Thanks to the use of sensors and technical automation components, building and usage data is collected to make building operation more efficient and economical. Automatic doors and windows, in particular, contribute to a positive user experience. With myGEZE Control, guests and personnel alike enjoy a boost in well-being thanks to precise control of indoor air and door technology systems – and operators can improve their energy and operating costs as well.

Sustainability

Controlled activation of doors and windows helps use resources efficiently and make device data analysis easy to understand. Smooth communication between the different systems optimises use of the building.

Building safety

Multifunctional system solutions combine the requirements of safety and security solutions.

Monitoring and remote access

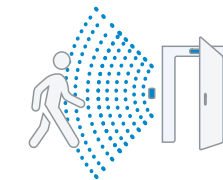

MyGEZE Visu serves as a tool for access control and exchanging information in order to identify errors early on and plan preventative maintenance activities.

CORRIDORS AND PASSAGE AREAS

Pass through doors – without even noticing them

On the way through a hotel, guests pass through a variety of areas – from the lobby to corridors to guest rooms and restaurant areas. Fire protection doors and automated door systems equipped with GEZE hold-open systems allow guests to pass through with non-contact, barrier-free access – an excellent convenience feature for persons with restricted mobility and for guests with luggage or buggies.

Convenient access

Automatic doors for easily entering a room

Improved hygiene

Non-contact, hygienic convenience for building users

Increased safety

Automatic locking systems ensure locking in accordance with insurance requirements and protection.

Safety in case of a fire

Hold-open systems allow fire protection doors in your building to be used with barrier-free access. In an emergency, they close fire protection doors automatically and safely.

→ **Slimdrive EMD-F/R**
Electromechanical swing door drive for single leaf fire and smoke protection doors with integrated smoke switch

→ **Hold-open systems**
With hold-open systems, fire protection doors in your building can be used to provide barrier-free access

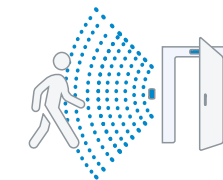

→ **IQ lock AUT**
System solution for full panic doors with automated door leaves on both sides

GUEST ROOMS

Creating a comfortable atmosphere

In addition to a hotel's service, furnishings and guest room interiors often play a key role in guests' impressions. Functional comfort and an aesthetic sensibility must be combined. GEZE offers a variety of solutions to help you and your service team save time and work.

Improved hygiene
Non-contact with hygienic convenience

Intelligent room partitions
Separate areas with flexible room and sliding door systems

Noise reduction
Innovative door dampers ensure quiet closing

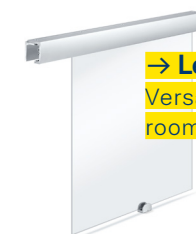

Indoor air hygiene
Autonomous control of fresh air intake improves air quality

Reduced energy costs
Energy savings thanks to natural ventilation

→ ECTurn Inside
Integrable electromechanical swing door drive for barrier-free single leaf doors weighing up to 125 kg

→ Levolan
Versatile glass systems structure the room and create a unique atmosphere

→ TS 5000 SoftClose
Door closer with guide rail for single leaf doors with latching action/smooth latching function

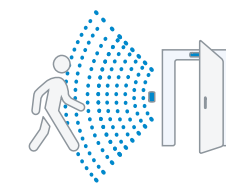

→ GEZE Slimchain
Chain drive in attractive design with many possible applications

RESTAURANTS, BARS AND BUSINESSES

Inviting, comfortable and safe enjoyment

Automated window systems controlled by sensors and carefully coordinated building automation provide fresh air. One advantage of a sufficient fresh air supply is that it improves indoor air hygiene, thereby improving well-being.

Improved safety

Locking in accordance with insurance requirements thanks to automatic locking systems

Reduced noise level

Smooth and seamless service process

Clean air

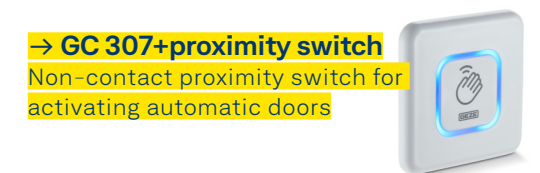

Controlled opening and closing of windows depending on air quality provides fresh air and improves indoor air hygiene

→ **Slimdrive EMD-F**
Electromechanical swing door drive for single leaf fire and smoke protection doors, kitchen door

→ **LED sensor foot switch**
Switch to activate automatic doors

→ **GC 307+proximity switch**
Non-contact proximity switch for activating automatic doors

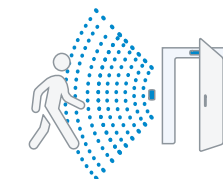

→ **Powerchain**
Powerful chain drive for opening and closing large and heavy windows

SPA, WELLNESS AND FITNESS AREAS

Relax and recharge with no compromises

Automatic doors allow users to pass through easily – with no physical contact. This improves hygiene in spa and wellness areas. Pools, saunas, gyms and massage therapy rooms – these are all areas that require high hygienic standards, safety and peace and quiet. We ensure those standards are met through door damping or automatic door systems, combined with access control.

The highest hygiene standards

Non-contact access is important in recreational facilities. Automatic doors are the answer,

Increased safety

GEZE access control systems ensure that doors open only for individuals who can prove that they are authorised to enter. They reliably deny access to uninvited visitors, and allow authorised persons to pass through.

→ **ECdrive T2**
Automatic linear sliding door system for doors with up to 140 kg leaf weight and an installed height of 100 mm

→ **GEZE ECturn**
Electromechanical swing door drive for accessible single leaf doors weighing up to 125 kg

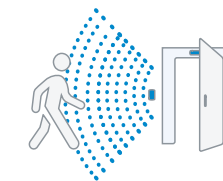

→ **Proximity switch GC 307+**
Non-contact proximity switch for activating automatic doors

CONFERENCE ROOMS

Meetings in a quiet, concentrated atmosphere

Hotels are not only popular among holiday travellers – they are also often used for conferences and meetings. GEZE offers well-designed solutions: door dampers and quiet door drives minimise disruptive background noise; automated windows deliver a good supply of fresh air and improve indoor air hygiene. Glass partition walls with switchable active glass provide a discrete privacy shield when needed – while also serving as a visual highlight, since they can be used as a projection surface as well. Make more out of your conference rooms – we are happy to advise you!

Comfortable working environment

Doors close quietly, even in side rooms, ensuring attendees are not distracted or disrupted in their meeting.

More flexibility

Glass partition walls with “switchable glass” serve as a privacy shield, projection surface, or whiteboard.

Better indoor air hygiene

Sensors measure CO₂ content in the air and transmit data to the control unit. This allows for room ventilation on an as-needed basis.

→ **Boxer**

Integrated door closer for 1 and 2-leaf doors, individual conference rooms, as a hold-open system meeting fire protection requirements

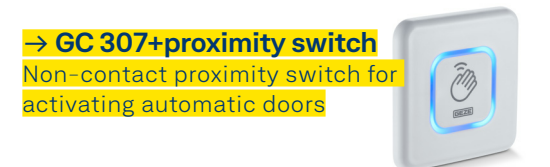

→ **GEZE ActiveStop**

Door damper on both sides for swing doors

→ **GEZE Powerchain**

Powerful chain drive for opening and closing large and heavy windows

→ **GC 307+proximity switch**

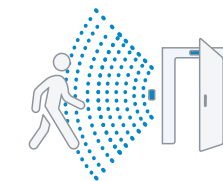

Non-contact proximity switch for activating automatic doors

BUILDING CLEANING

Save costs and time with GEZE solutions

GEZE offers practical and efficient solutions to facilitate cleaning and work processes and ensure cleaning personnel can do their work properly. Door closers with a hold-open function, for instance, make door stoppers mounted on the floor unnecessary. This makes room hygiene easier, because the floor can be cleaned without obstacles. Ventilation is another good example of where to save time and costs. Opening all doors and windows at once facilitates efficient impact ventilation.

Comfortable cleaning

Easy cleaning and efficient work processes through holding open guest room doors.

Investment in clean air

Controlled opening and closing of doors and windows depending on indoor and outdoor air quality allows for efficient impact ventilation.

→ **Perlan AUT**
For automation of single and multi-leaf sliding doors

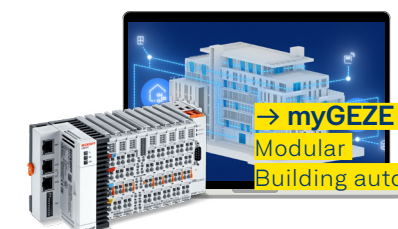

→ **Ecturn Inside**
Integrable electromechanical swing door drive for barrier-free single leaf doors weighing up to 125 kg

→ **GEZE ActiveStop**
Door damper on both sides for swing doors for the connecting door in "family rooms"

→ **GEZE Slimchain**
Chain drive in attractive design with many possible applications

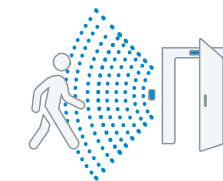

→ **myGEZE Control**
Modular Building automation system

BACK OF HOUSE

Efficient work in optimum conditions

GEZE offers efficient solutions that help optimise the “back of house” – from safe access solutions to non-contact door and window systems with smart networking via the building automation control system. These allow for central monitoring and control of “back of house” doors, such as office doors for the hotel management or reservations. The building management system can react immediately in case of an alarm, malfunction or manipulation of a door.

Improved hygiene

Non-contact entering and leaving with automatic door systems

Improved working conditions

Noise reduction thanks to doors that close quietly

Improved safety

Access control systems to offices and staff areas only allow access to authorised personnel.

Good through ventilation

Air quality is measured by sensors. Windows open as needed for natural ventilation.

→ **Slimdrive EMD-F**
Electromechanical swing door drive for single leaf fire and smoke protection doors

→ **GC 307+proximity switch**
Non-contact proximity switch for activating automatic doors

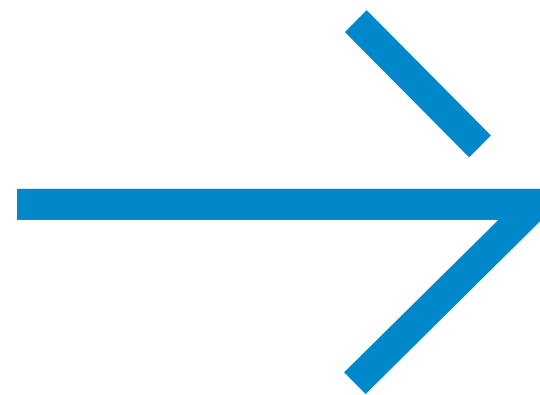

→ **GCER 300**
Access control solutions for door monitoring and controlling

→ **GEZE Slimchain**
Chain drive in attractive design with many possible applications

Investments in new technology,
technical retrofitting and outstanding hygienic
safety are investments in the future,
to ensure your guests feel comfortable and safe at your facility.

We are happy to advise you! We can
even implement highly individualised specifications for door,
window and safety technology,
as well as building planning and hygiene.

INVEST IN THE FUTURE WITH SAFETY
